# WTC Utah Observations

**April 2013:** Our April export statistics consisted of a number of positive revelations. First, the Foreign Trade Division of the U.S. Census Bureau released revised final figures for 2012 raising our new total to \$19.25 billion from the previously reported \$19.11 billion. Secondly, despite uncertain expectations in regard to our ever-important Precious Metals industry, Utah experienced 31% April growth in that sector over the previous year's April— and very nearly matching the March 2013 figures for the industry. It appears that the worldwide trend of diversion of refined gold from the United Kingdom to India has not yet meaningfully impacted Utah exports. Diversified exports continue to perform well and a strong April has served to narrow the deficit in year-to-date comparisons to approximately 9% below 2012.
