WTC Utah Observations

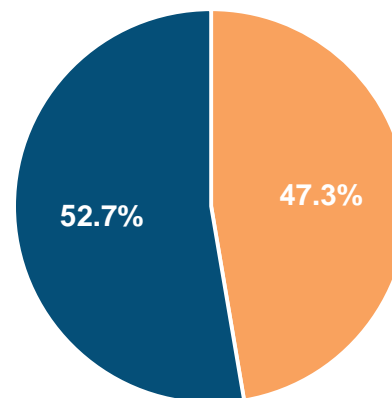

Exports in 2015 continue to do better than exports in 2014. Compared to the same month in 2014, Utah exported 64% more good in terms of value of goods exported.

In July, value-added exports consisted more than half of Utah's exports, which is a good sign of Utah's diversification of its exports. Most months, metal exports dominate exports.

For the first time in 2015, Switzerland made it on the top five export destination's list. This can be attributed to a significant and sudden increase in primary metals exports to Switzerland.
